### ***Specification***

The abstract of the disclosure is objected to because legal phraseology "comprising" is used in the Abstract. Correction is required. See MPEP § 608.01(b).

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The disclosure is objected to because of the following informalities: On page 1, line 5, the phrase "according to the preamble of claim 1" should be deleted since "claim

Art Unit: 1797

1" can be amended or deleted during the prosecution and would not have the same original limitations. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Dow (2,742,105).

Dow teaches a removable dust collector for use in a dust compartment of a vacuum cleaner (col. 1, lines 60-65) comprising a holder (29) and a locking member (27) in which the locking member is maintained in the release position of the filter bag (c) inserted into a carrier and coupling to the dust collector (see Figs. 3, 4, 6 & 7, col. 3, lines 18-30). Dow further teaches the carrier (18) being pivotally supported on the vacuum cleaner housing by means of a pivot bearing (20).

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Albert et al (2004/0163205 A1).

Albert et al teaches a removable dust collector for use in a dust compartment of a vacuum cleaner (col. 2, paragraph 0031) comprising a holder (6) and a locking member

in which the locking member is maintained in the release position of the filter bag (5) inserted into a carrier and coupling to the dust collector (see Figs. 1-4, paragraphs 0033 and 0035). Dow further teaches the carrier (7) being pivotally supported on the vacuum cleaner housing by means of a pivot bearing (8, see col. 2, paragraph 0031).
